

F. Structural Requirements:

1. Location On Fault Traces Prohibited; Minimum Setbacks To Be Determined: No portion of any structure intended for human occupancy shall be located over any fault trace or zone of deformation identified in the geotechnical and geology report submitted as provided in this chapter. The minimum setback distance from any fault trace or zone of deformation, or from the base or crest or any potentially unstable slope shall be as established by the city engineer following the receipt of a recommendation on the subject from the geotechnical engineer as part of the technical reports.
