

## 15-06-02 General Non-Residential Development Standards

- J. **Lighting.** Reflectors, spotlights, floodlights and other sources of illumination may be used to illuminate buildings, landscaping, signs, parking and loading areas, provided they are equipped with proper lenses or other devices concentrating the illumination upon the building, landscaping, signs, parking and loading areas, and preventing any bright, direct illumination upon adjacent property or any public right-of-way. No unshielded lights, reflectors, spotlights, strobe lights, or search lights shall be so located that they are pointed towards or are directly visible from public rights-of-way.

All street light fixtures shall be installed to prevent light glare from adversely affecting adjacent properties. Exterior wall mounted floodlights are expressly prohibited. For parking lot lighting, pole mounted fixtures are recommended. Lighting of all pedestrian pathways is recommended. Lighting of a building and site identification signs are permitted.

Lighting will be judged as to how adequately it meets its intended purpose. Design and location of standards and fixtures shall be specified on the site development drawings. Intensities shall be controlled so that neighboring areas will not be adversely affected by glare or excessive direct light.
