

7-14-216. DRIVE-THROUGH WINDOW STANDARDS.

All buildings with a drive-through window must incorporate one of the options below:

(1) A permanent, covered porte-cochere structure over the drive-through window that is the width of the drive, a minimum of 20' in length, and integrated structurally and architecturally into the design of the building.

(2) A permanent cover over the drive-through window that is at least 3' wide, 10' in length and integrated structurally and architecturally into the design of the building.

(See illustration below.)
