

17.05.130: WATER AND SEWAGE REQUIREMENTS:

A. All proposed uses and/or buildings needing the use of water and sewage facilities shall comply with the requirements of the Bear River health department, the Utah department of environmental quality, and the office of the state water engineer. These agencies shall be considered the county experts in evaluating the proposed sewage and culinary water supply system.

B. No proposed septic system shall be permitted within a zone 1 or zone 2 as defined by the current drinking water source protection plan for any public culinary water system. (Ord. 2004-10, 8-10-2004)
