

Chapter 19.70 AOZ AIRPORT OVERLAY ZONE

19.70.130 Transitional zones--Height limitations.

A. The height limitation in a transitional zone slopes upward and outward seven feet horizontally for each foot vertically, beginning at the side of and at the same elevation as the primary surface and the approach zones, and extending to a height of one hundred fifty feet above the airport elevation.

B. In addition to the foregoing, there are established height limits sloping upward and outward seven feet horizontally for each foot vertically, beginning at the sides of and at the same elevation of the approach zones, and extending to where they intersect the conical surface.

C. Where the precision instrument runway approach zone projects beyond the conical zone, height limits sloping upward and outward seven feet horizontally for each foot vertically shall be maintained beginning at the sides of and at the same elevation as the precision instrument runway approach surface, and extending to a horizontal distance of five thousand feet, measured at a ninety-degree angle to the extended runway centerline. (§ 1 (part) of Ord. passed 8/22/84: prior code § 22-30A-14)
