

19.82.080 Size computation.

A. The following shall be used when calculating sign sizes: When more than one use occupies a lot, the frontage may be used to calculate the sign size for one total ground or projecting sign, not for each use. The total may then be divided between the uses. There may be any number of flat or wall signs, provided their total does not exceed the percentage of wall area coverage allowed.

B. A property line which abuts a nonaccess freeway, road, street or right-of-way may not be used in computing sign area. (Ord. 1034 § 1 (part), 1988)
