

19.84.075 Graffiti preventative materials or design.

A. Whenever the planning commission determines that there is a reasonable likelihood that graffiti will be placed on the surfaces of proposed improvements it shall require, as part of the conditional use approval, that the applicant apply an anti-graffiti material, approved by the development services division, to each of the surfaces to be constructed. The anti-graffiti material shall be used on surfaces from ground level to a height of nine feet. The planning commission may approve dense planting or appropriate design measures in place of anti-graffiti materials.

B. Whenever the planning commission becomes aware of graffiti having been placed on any surfaces constructed as part of development approved as a conditional use, it may require that the applicant or his/her successor in interest apply an anti-graffiti material to such surfaces where no such material was previously required. (Ord. 1290 § 4, 1995)
