

G. Road Base Specifications:

1. All roads shall be designed by a qualified engineer.
2. All roads shall have a base capable of supporting a gross vehicle weight of at least forty thousand (40,000) pounds. The county engineer may require additional support base depending on the specific function and traffic volumes anticipated on the roadway.
3. All roads shall include compacted road base, covered with either concrete or asphalt material, with the exception of emergency access roads, which may be compacted gravel or road base. Roads must meet all applicable county design standards.
4. All road surfaces must be capable of providing all weather, year around access, with the exception of emergency access road in mountain/remote areas and areas zoned sensitive lands (SL), where emergency access roads must provide only summer access.
