

I. Traffic Control And Street Signage:

1. All roads will be designated with road names, and signs will be installed at each major road intersection. All lots and/or home sites will be visibly signed with street addresses and numbered as such or at the beginning of the driveway. Emergency access road shall be clearly identified.
2. All roads shall be named or numbered in accord with the county's addressing system and road identification signs in accordance with county standards and specifications. All permitted structures for residential, commercial and industrial uses shall post addresses prior to occupancy.
3. A developer shall be responsible for the expense of constructing and placing traffic control signs, as follows:
 - a. Stop signs shall be placed at all intersections of arterials; of collectors and arterials; and when appropriate, as determined by the county engineer, local streets/roads and collectors.
 - b. Yield signs shall be required at the intersection of all other streets and roads when determined appropriate by the county engineer.
